

Customer Database & Sales Team Analysis

Record-Keeping & Account Management Report

AUTHOR
Data Analysis Team

PUBLISHED
June 5, 2026

1 Executive Summary

This report presents the findings from a full audit of the company’s customer database. The analysis covers **2,273 verified customer records** across **31 active sales representatives** and **20+ regions** nationwide.

⚠ Three Actions Requiring Immediate CEO Attention

- 1. **441 customers (19.4% of the base)** are managed by just two reps — Ian and Peter — with no backup or succession plan in place.
- 2. **341 customers** are assigned to a placeholder entry called “*Customer Office*” and have no named sales representative.
- 3. **Address and contact data gaps** exist across the database — 9.3% of customers have no street address and 4.7% have no phone number.

2 Dataset Overview

2.1 Cleaning Summary

The raw database required significant cleaning before analysis. The table below summarises what was found and what was done.

Table 1: Data Cleaning Steps Applied to Raw Database

Step	Issue Found	Action Taken
1	Metadata rows at top of file	Removed 5 header/metadata rows
2	Incorrect column names	Set correct names from row 5
3	Mixed-case text in all columns	Trimmed whitespace; applied title case to rep names
4	3 near-empty columns (100% / 99.6% missing)	Dropped Address Line 2, Address Line 3, Post Code
5	Fax Number 70% missing	Dropped Fax Number column
6	6 junk rows (Hebrew text, notes, no customer ID)	Removed non-customer rows
7	3 suspect sales rep entries (dummy IDs, Hebrew placeholders)	Removed ככלי, Oded, DR MUSILIU AGBOOLA
8	Remaining rows with any missing value	Removed; 2,273 complete records retained

2.2 Final Dataset Dimensions

Table 2: Final Clean Dataset at a Glance

Metric	Value
Total customer records	2,273
Columns retained	7
Active sales reps	31
Regions covered	20+
Missing values remaining	0

3 Sales Team Analysis

3.1 Customers Per Sales Representative

[Figure 1](#) shows the number of customers each sales representative currently manages, ranked from highest to lowest.

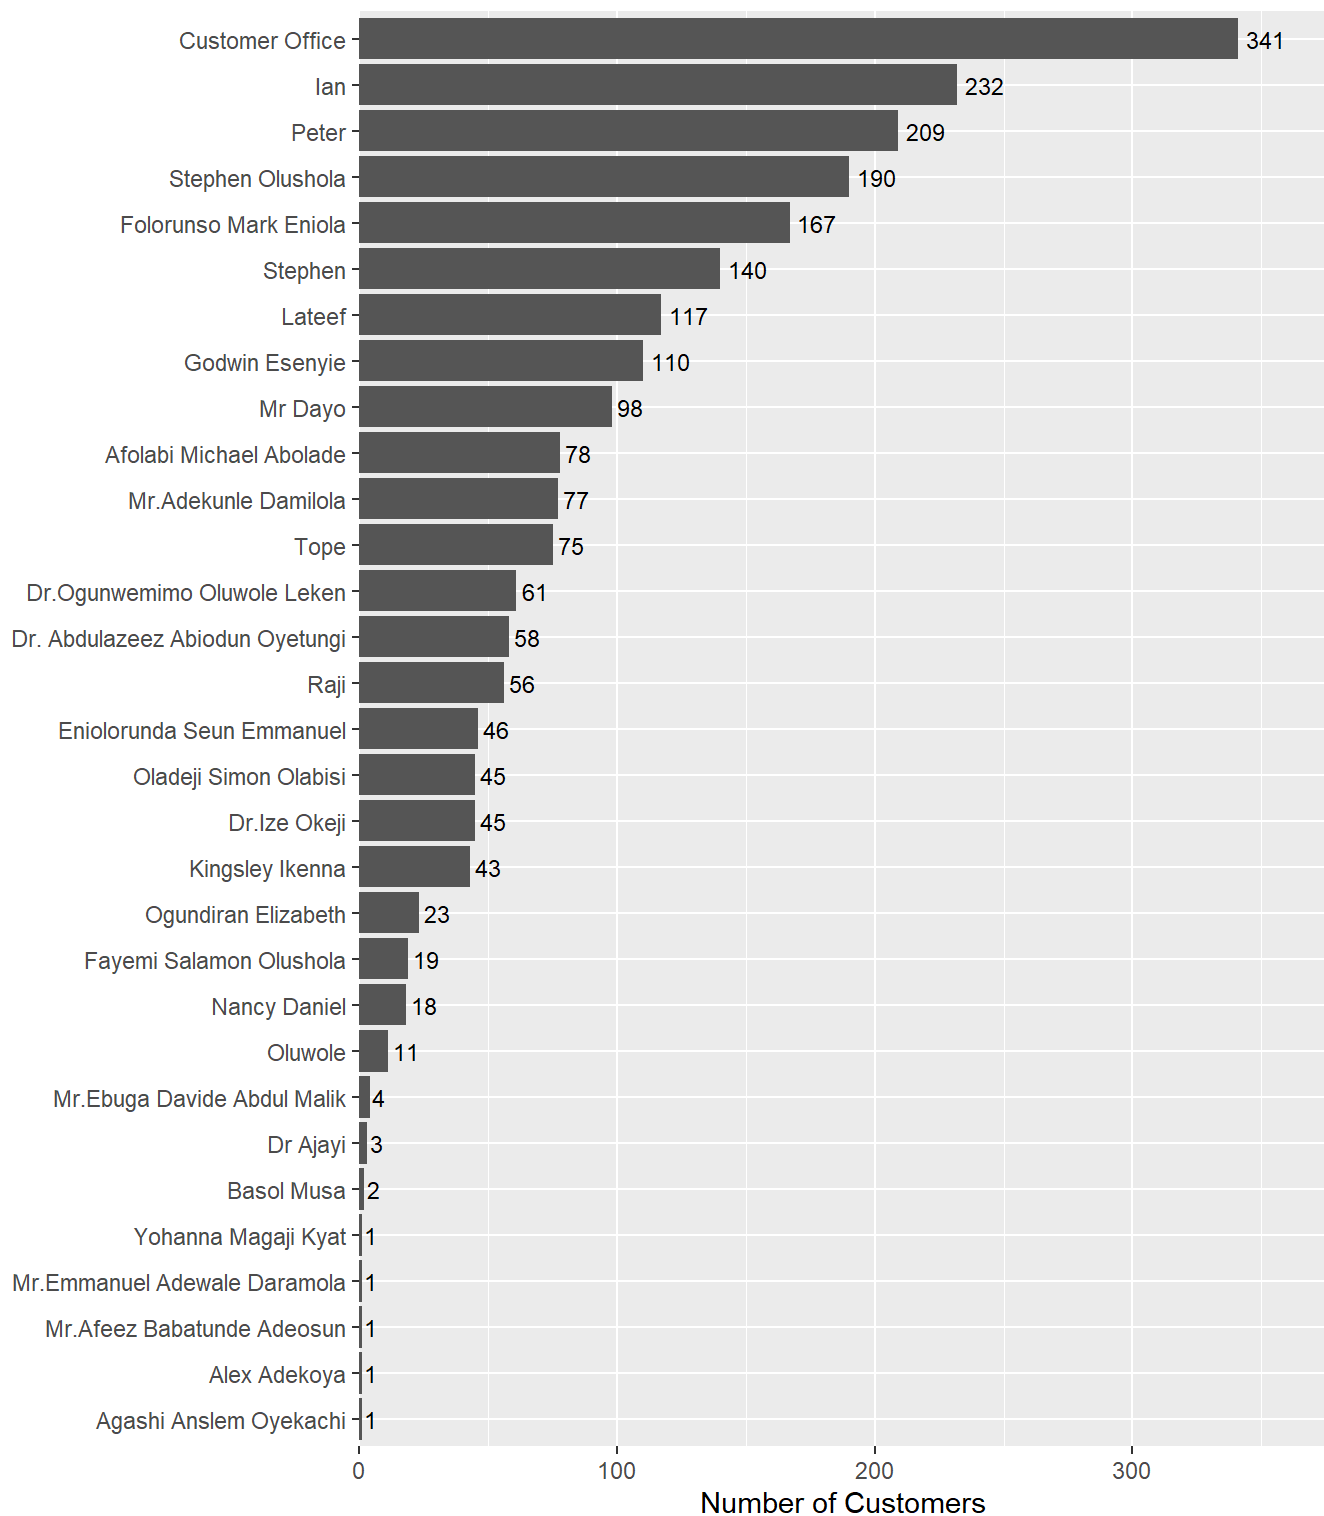

Figure 1: Number of customers managed per sales representative (all reps)

Key Observations

- **“Customer Office”** (341 customers) is a placeholder — not a real rep. These accounts are effectively unmanaged.
- **Ian (232) and Peter (209)** carry the heaviest legitimate workloads, each managing roughly twice the number of customers of any other rep.
- **5 reps manage only 1 customer each** — these should be verified as active.

3.2 Workload Distribution – Real Reps Only

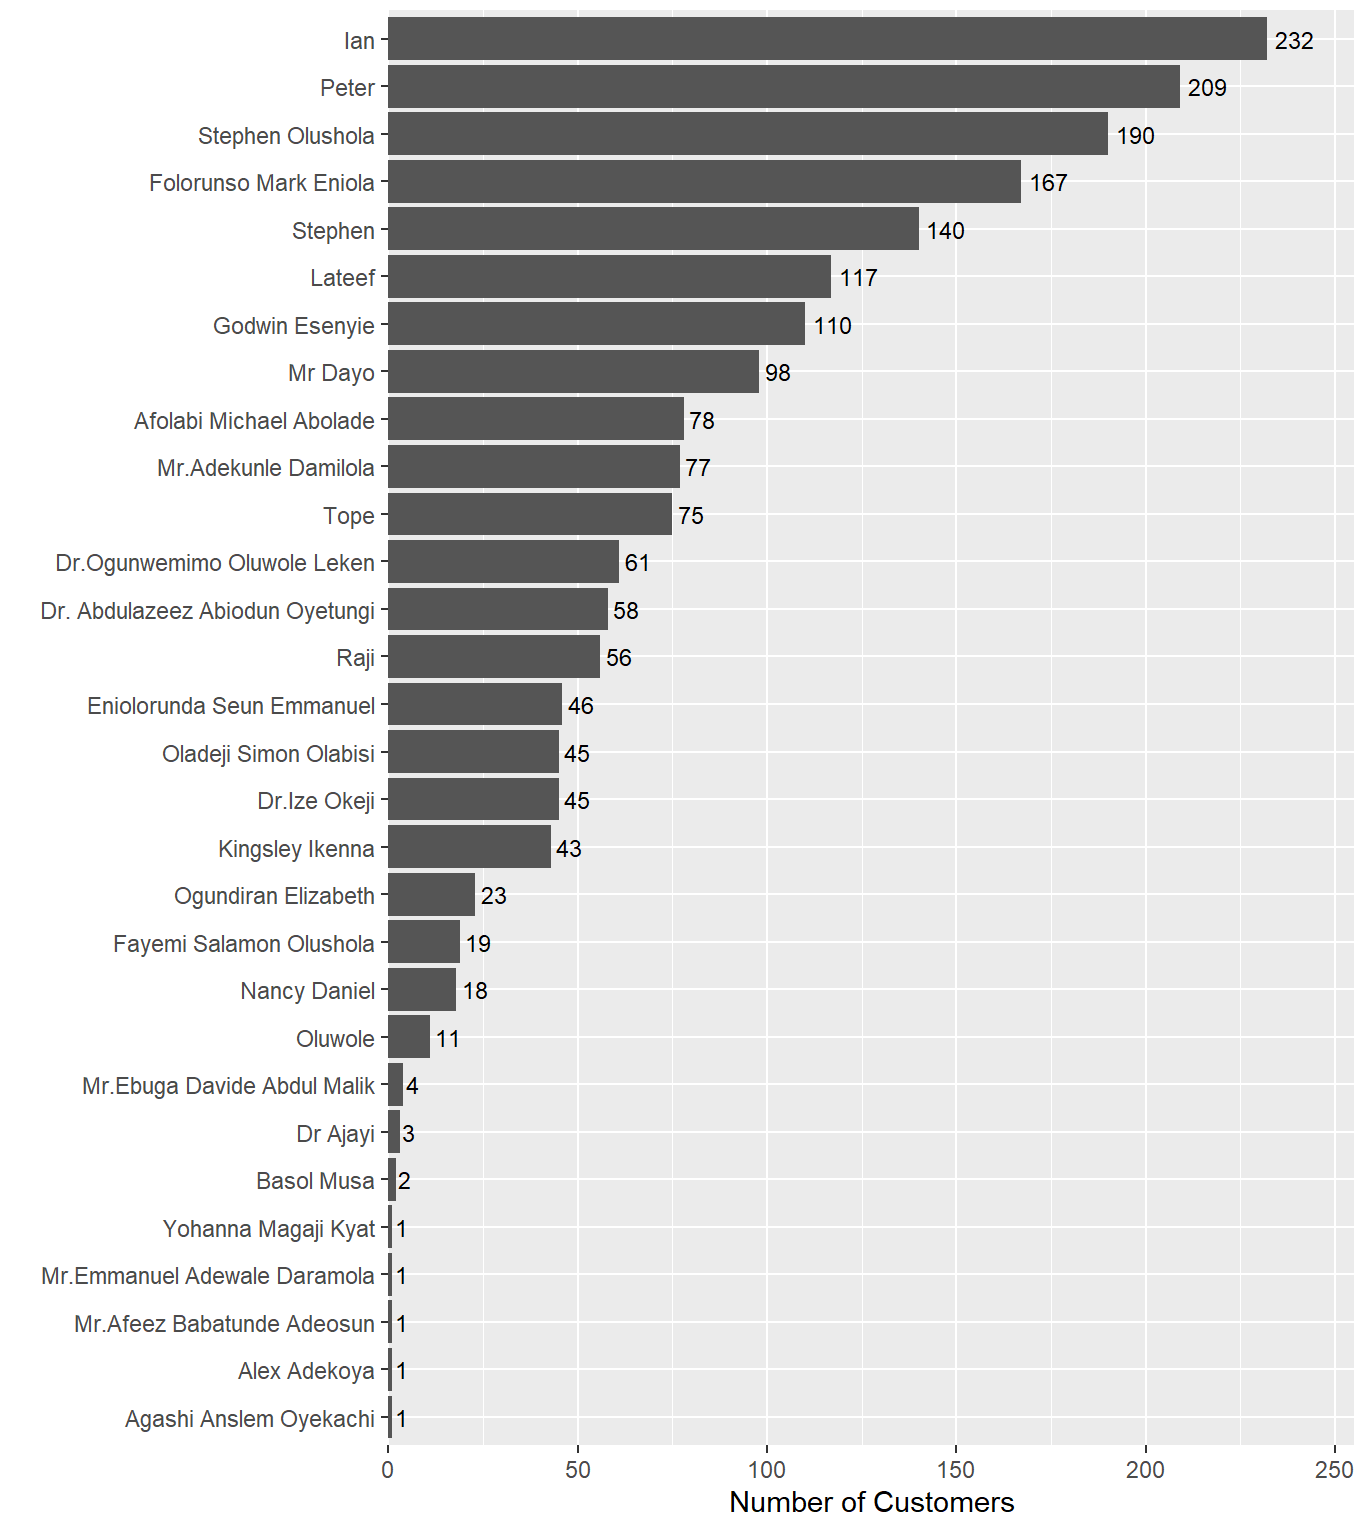

Figure 2: Customer count per rep – excluding ‘Customer Office’ placeholder

4 Geographic Distribution

4.1 Where Are Our Customers?

Figure 3 shows how customers are distributed across cities and states nationwide, after consolidating inconsistent location entries from the raw database.

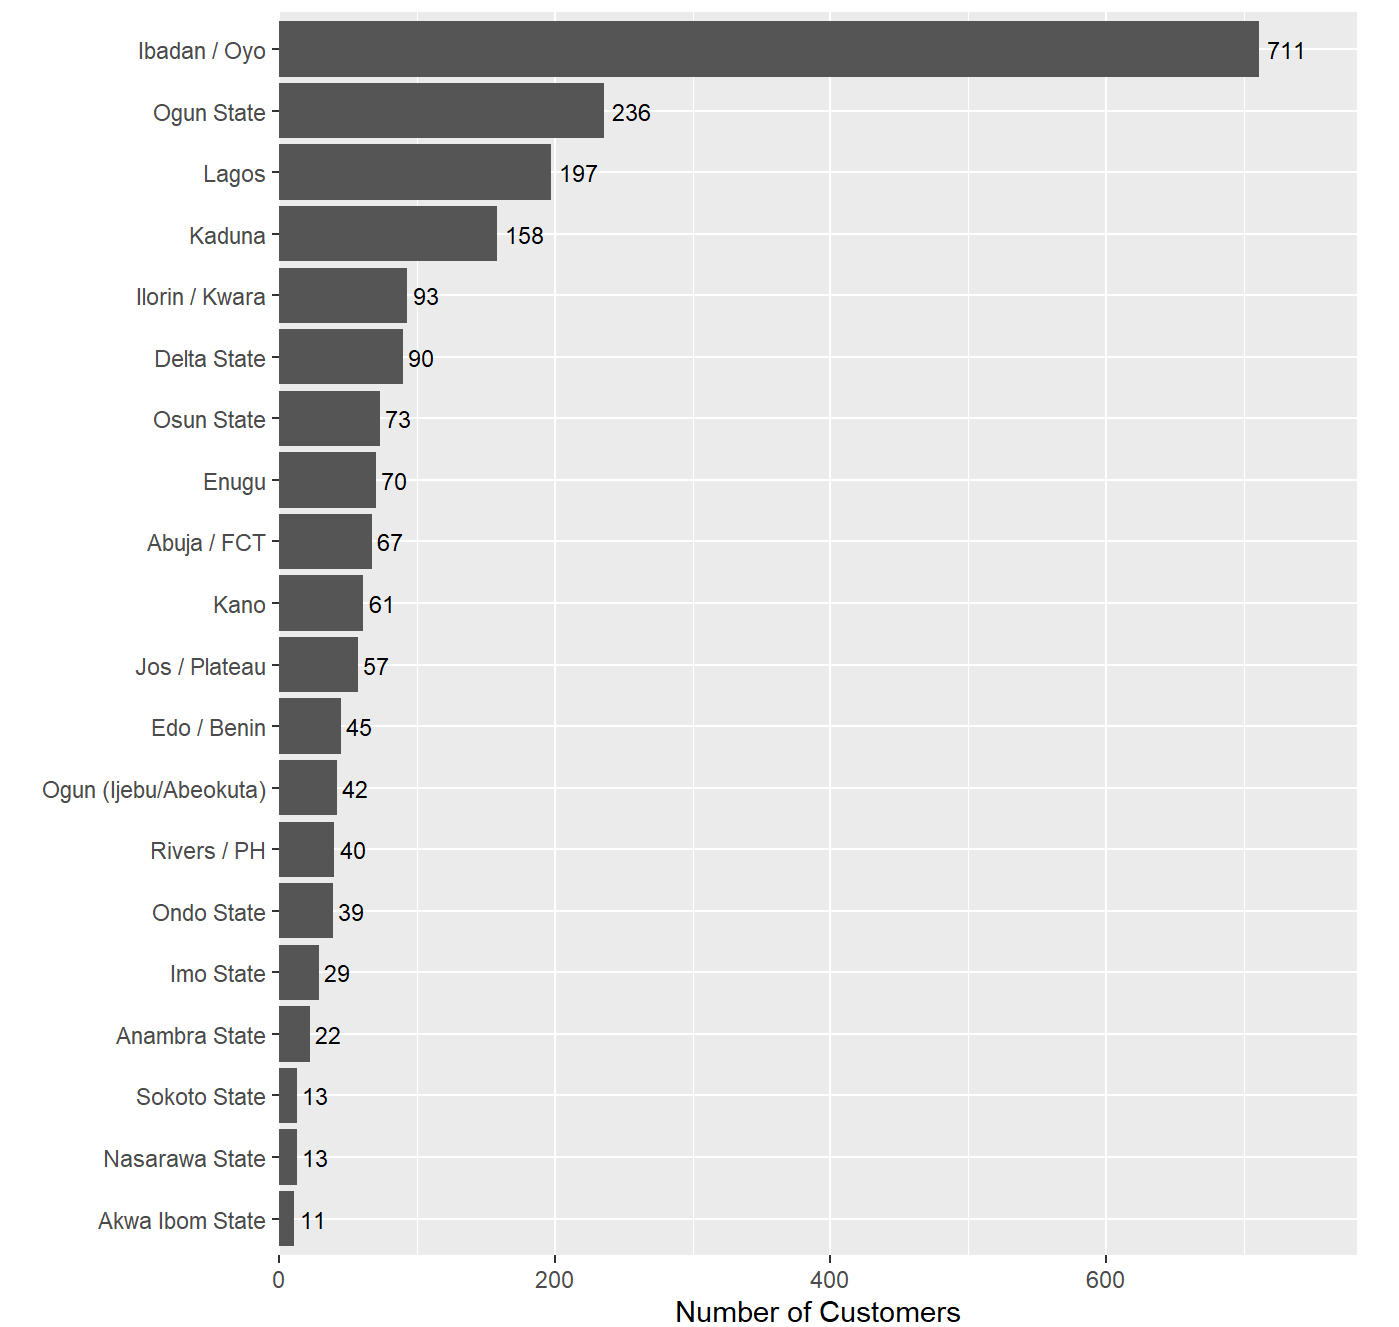

Figure 3: Customer distribution by location — top 20 cities / states

i **Geographic Highlights**

- **Ibadan / Oyo** is the dominant market with 711 customers — nearly 3× the next largest location.
- **Ogun State (236), Lagos (197), and Kaduna (158)** form the next tier.
- Southern and middle-belt states hold 70–95 customers each, suggesting broad national reach but thin coverage outside the South-West.

5 Regional Coverage by Sales Rep

Figure 4 maps which reps are active in which regions, using the top 10 locations and top 15 reps. Darker cells indicate more customers.

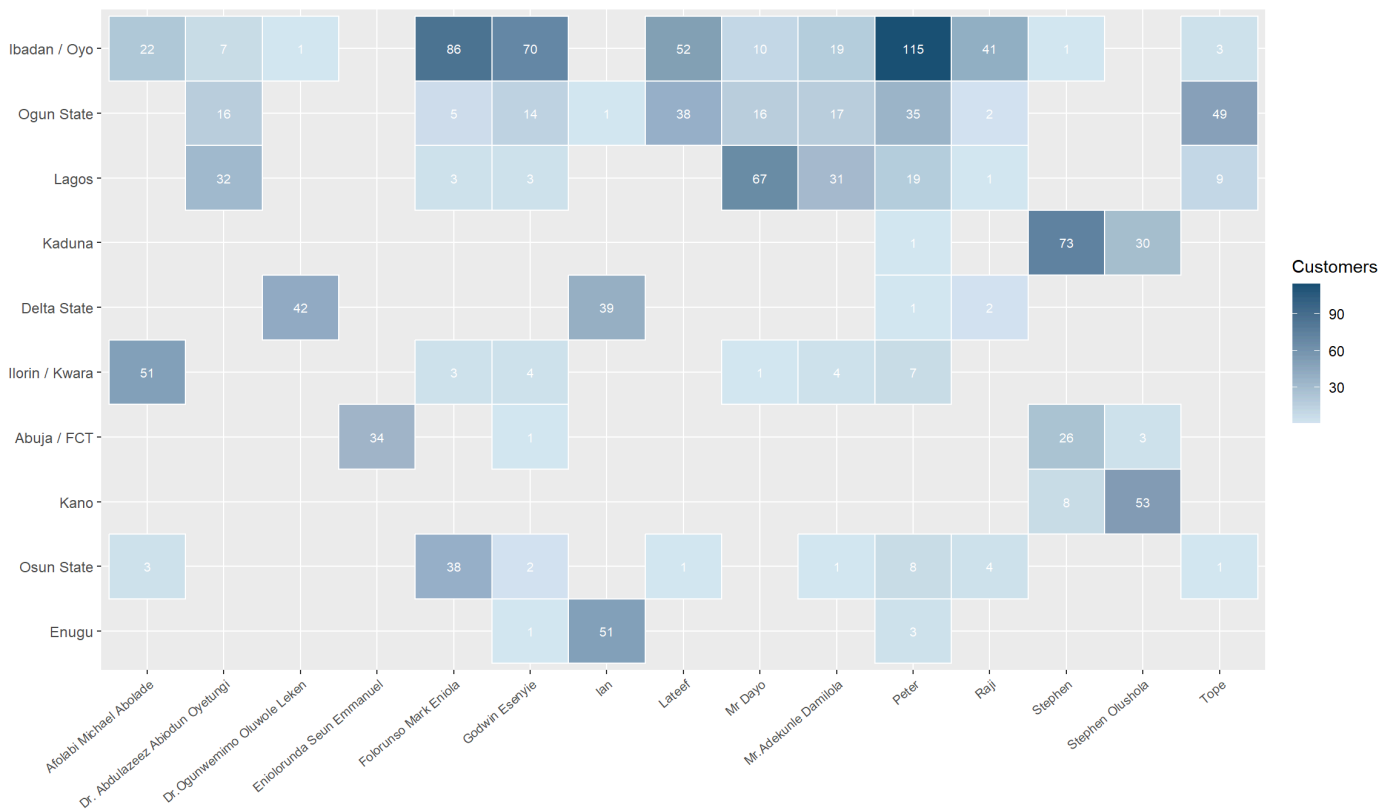

Figure 4: Sales rep coverage heatmap – top 10 regions × top 15 reps

 Territory Overlap Concerns

- Most regions have **multiple reps sharing the same territory** with no clear ownership – creating confusion and duplicated effort.
- **Peter** is the only rep active across 6+ regions, creating a single point of failure for the South-West.
- **Ian** dominates the entire South-East corridor across 31 regions.

6 Key Account Management Risks

6.1 Risk Overview

Table 3: Ian vs Peter – Side-by-Side Risk Comparison

Metric	Ian	Peter
Total customers managed	232	209
Regions covered	31	22
Regions with only 1 customer	13	13

Metric	Ian	Peter
Largest single region	Enugu — 51 (22%)	Ibadan — 115 (55%)
Portfolio concentration	Low (evenly spread)	High (Ibadan-heavy)
Geographic coherence	Strong (South-East corridor)	Weak (scattered)
Succession difficulty	Very High	High

6.2 Ian — Regional Spread

232 customers | 31 regions | South-East corridor specialist

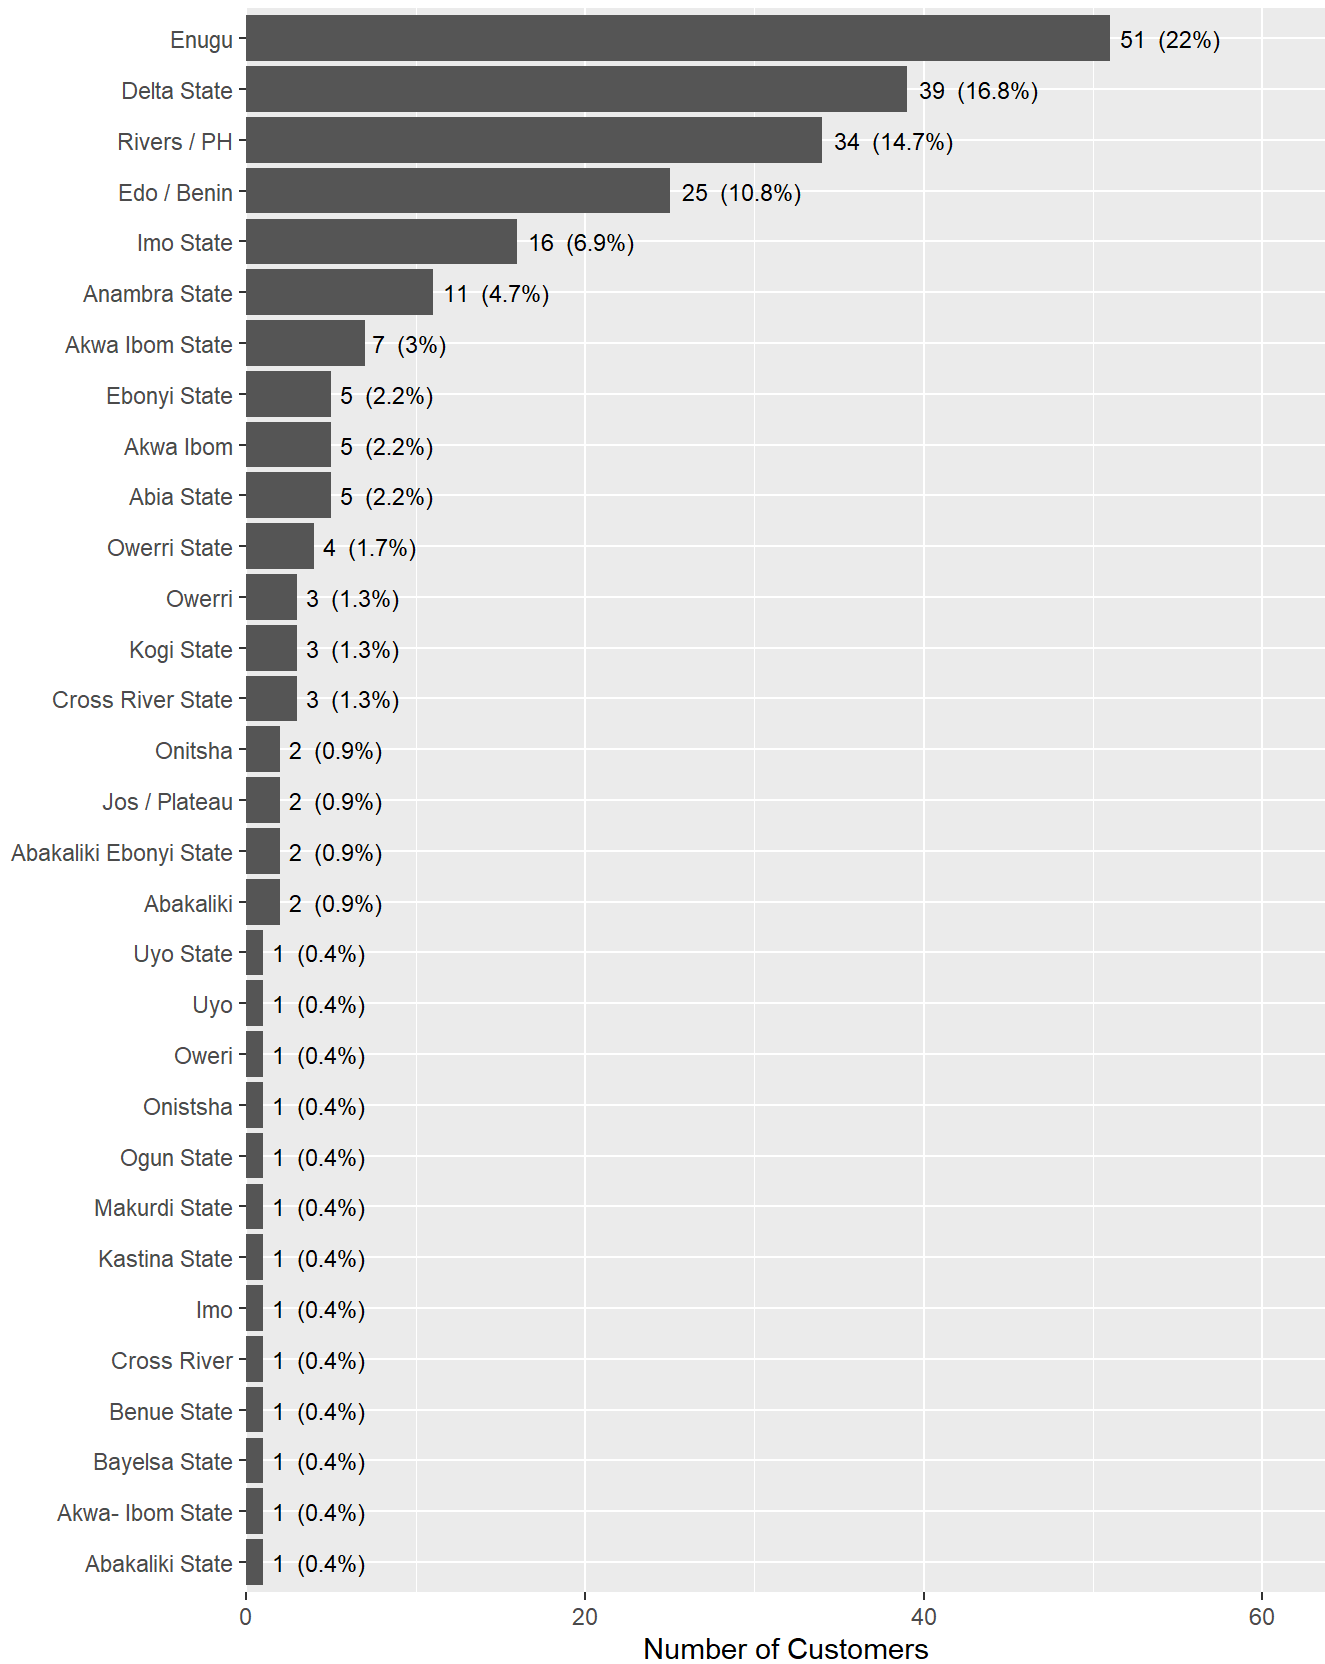

Figure 5: Ian — 232 customers across 31 regions

Ian is the business's largest rep by customer count. His portfolio spans **31 regions** — the widest of any rep — with **no dominant anchor region** (largest region: Enugu at only 22%). If Ian left, accounts would need to be redistributed across 31 different regions simultaneously, making him the **highest succession risk** in the business.

6.3 Peter — Regional Spread

209 customers | 22 regions | 55% concentrated in Ibadan/Oyo

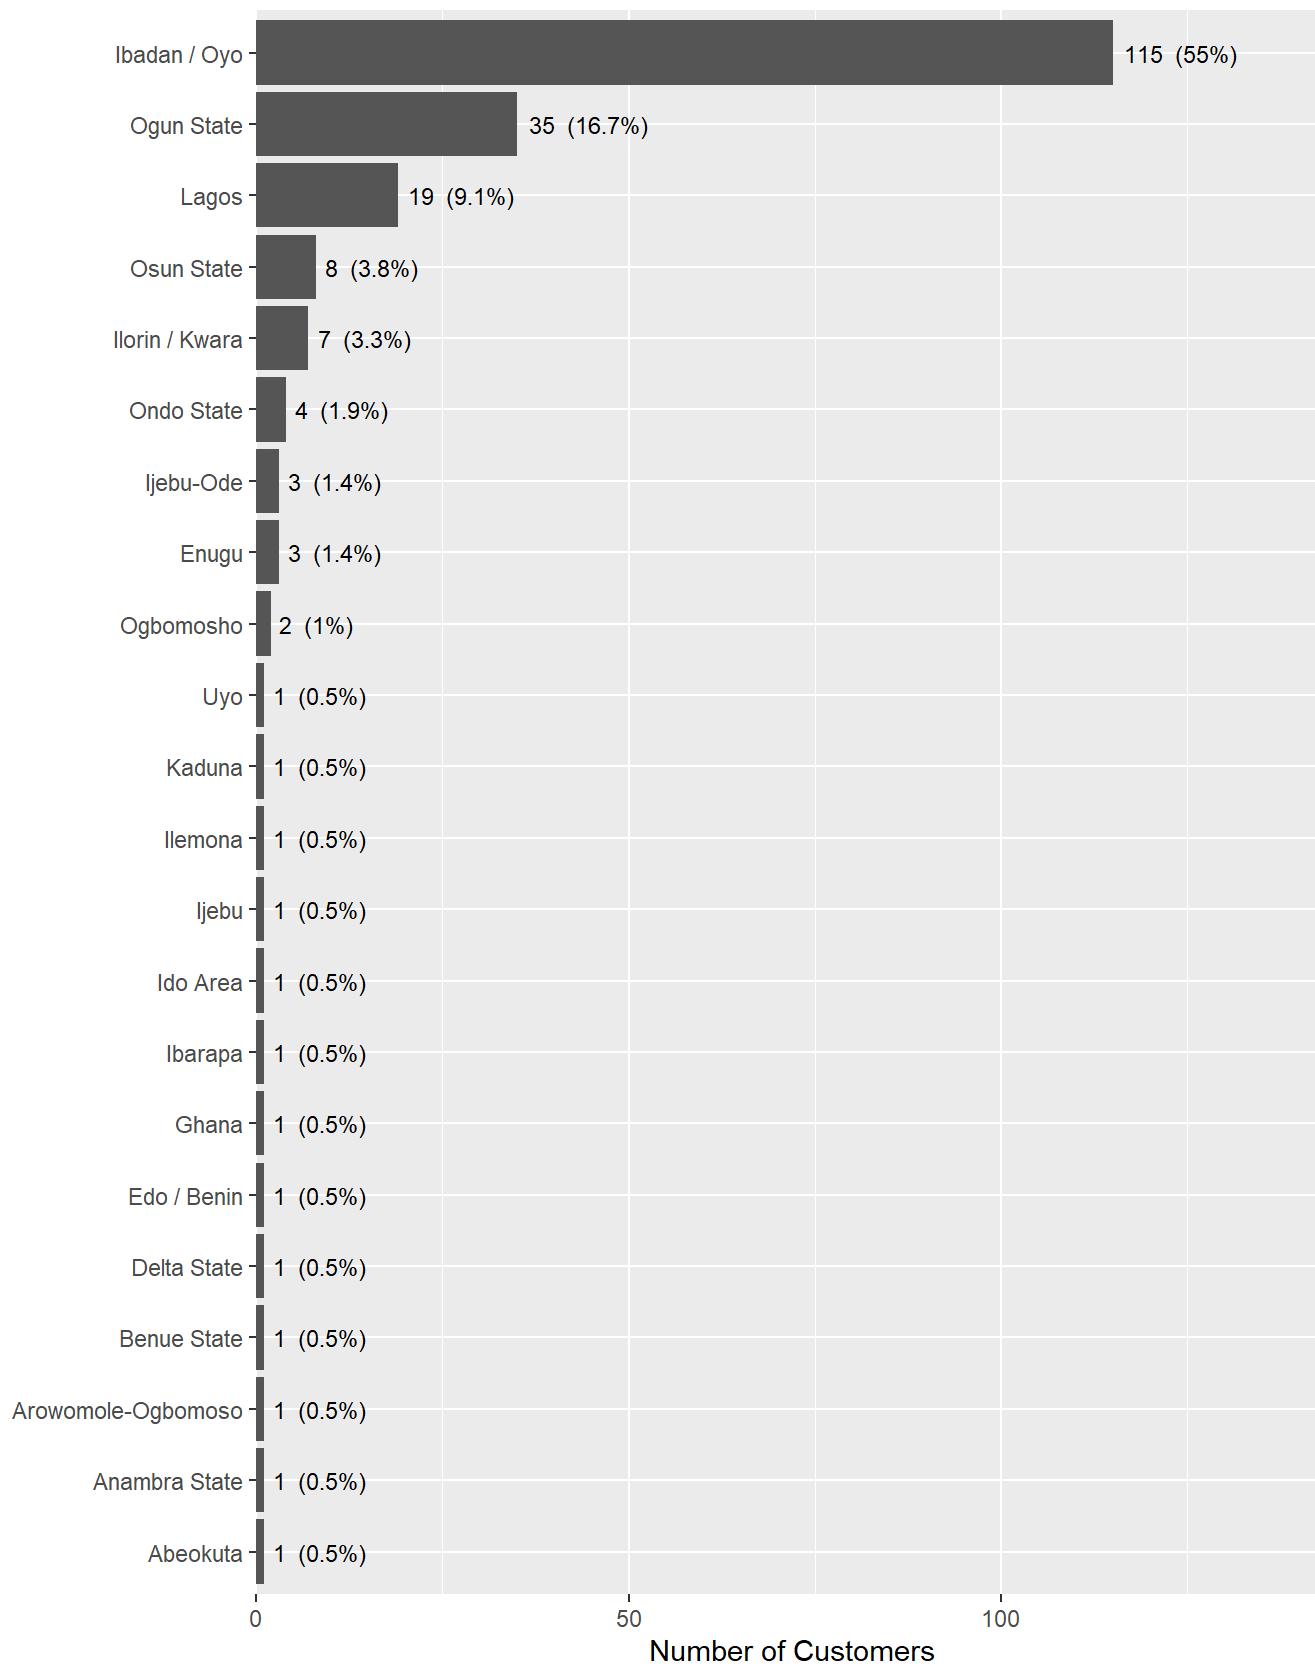

Figure 6: Peter – 209 customers across 22 regions

Peter manages **115 customers in Ibadan/Oyo alone** – the business’s single largest market (55% of his portfolio). He is also the de facto owner of this territory. Losing Peter would mean the largest customer hub in the database loses its primary relationship manager overnight. His 13 single-customer outlier regions (including Ghana, Kaduna, Benue) are geographically incoherent and likely receiving minimal attention.

7 Priority Action Plan for the CEO

Table 4: Recommended Actions – Prioritised for CEO

Priority	Action	Owner	Suggested Timeline
1	Identify a South-East deputy for Ian across his core 5 regions	CEO / HR	Immediate
2	Identify a named backup rep for Peter’s 115 Ibadan/Oyo accounts	CEO / HR	Immediate
3	Assign the 341 ‘Customer Office’ accounts to named sales reps	Sales Manager	Within 1 week
4	Redistribute Ian and Peter’s 26 combined single-customer outlier regions	Sales Manager	Within 2 weeks
5	Cap both Ian and Peter’s portfolios at 150 accounts	Sales Manager	Within 1 month
6	Define formal territory maps for all 31 reps	Sales Manager	Within 1 month
7	Fill missing street address and phone number gaps (9.3% and 4.7%)	Admin Team	Within 1 month

8 Appendix – Full Sales Rep Summary

Table 5: All Sales Representatives – Customer Count and Notes

Rank	Rep No.	Sales Rep Name	Customer Count	Note
1	2	Customer Office	341	Placeholder – 341 customers unassigned
2	3	Ian	232	High workload – review capacity
3	5	Peter	209	High workload – review capacity
4	407	Stephen Olushola	190	High workload – review capacity
5	509	Folorunso Mark Eniola	167	High workload – review capacity
6	4	Stephen	140	
7	501	Lateef	117	
8	513	Godwin Esenyie	110	
9	6	Mr Dayo	98	
10	512	Afolabi Michael Abolade	78	

Rank	Rep No.	Sales Rep Name	Customer Count	Note
11	508	Mr.Adekunle Damilola	77	
12	503	Tope	75	
13	311	Dr.Ogunwemimo Oluwole Leken	61	
14	605	Dr. Abdulazeez Abiodun Oyetungi	58	
15	2000	Raji	56	
16	412	Eniolorunda Seun Emmanuel	46	
17	406	Dr.Ize Okeji	45	
18	606	Oladeji Simon Olabisi	45	
19	322	Kingsley Ikenna	43	
20	502	Ogundiran Elizabeth	23	
21	417	Fayemi Salamon Olushola	19	
22	418	Nancy Daniel	18	
23	2040	Oluwole	11	
24	4080	Mr.Ebuga Davide Abdul Malik	4	
25	2010	Dr Ajayi	3	
26	409	Basol Musa	2	
27	130	Alex Adekoya	1	Single customer – verify rep is active
28	170	Mr.Afeez Babatunde Adeosun	1	Single customer – verify rep is active
29	413	Yohanna Magaji Kyat	1	Single customer – verify rep is active
30	3150	Agashi Anslem Oyekachi	1	Single customer – verify rep is active
31	5110	Mr.Emmanuel Adewale Daramola	1	Single customer – verify rep is active
